Art Unit: 1764

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14, drawn to a process of etching a substrate with a gas, classified in class 216, subclass 58.
- II. Claim 15, drawn to a method of making a bearing from powdered metal carbide, classified in class 419, subclass 52.
- III. Claims 16-23, drawn to a bearing, classified in class 508, subclass 102.
- IV. Claim 24, drawn to a method of manufacturing a prosthesis, classified in class 623, subclass 23.53.
- V. Claims 25-28, drawn to an electrical contact, classified in class 439, subclass 87.
- VI. Claims 29-34, drawn to a microelectromechanical device, classified in class 310, subclass 42.
- VII. Claim 35, drawn to a catalyst, classified in class 502, subclass 35.
- VIII. Claim 36, drawn to a molecular sieve for separating molecules, classified in class 585, subclass 943.
- IX. Claim 37, drawn to a process of synthesizing an ion-exchange material, classified in class 423, subclass 6.

The inventions are distinct, each from the other because:

Inventions I, II, IV and IX are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP §

808.01). In the instant case the different inventions comprise different process steps resulting in a different product.

Inventions III, V, VI, VII and VIII are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the products all have different functions i.e., the product of Group III can be used in a car. The product of Group V can be used in a home. The product of Group VI can be used in a hospital. The product of Group VII can be used in a research laboratory. The product of Group VIII can be used in a research laboratory for a different purpose than the product of Group VII.

The process of Group I can be used to make products different from Group III, V, VI, VII and VIII, such as tools.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
